

I am an XM Satellite Radio listener that is looking forward to the option of local traffic and weather reports via XM radio. Please reject the NAB's petition 04-160 as it makes no more sense to limit satellite radio content than it does to let one group of radio and television owners limit what another group of owners can broadcast. This is nothing more than wealth trying to maintain its monopoly position in order to preserve its wealth at the expense of a new broadcast player, and it will negatively impact consumers. Thank you for considering my voice.
